

I am devastated to learn that this planning application has been put forward.
I feel the absolute need to show you what we have to live with on a daily basis with NO building work happening.
This home owner has a building business and uses his home as a yard.
I have complained to Havant council in the past about the constant mess but you are unable to do anything as it's not food waste.
Isn't using your home as a yard not illegal??
In doing this there are constant skips on the drive which isn't taking this rubbish away but being emptied from the back of the works van into the skip. Then when the skips are full they sit there forever and aren't removed quickly so the floor rubbish builds up.
Also in doing this he is blocking the pavement for pedestrians while he unloads.
Living with this constant building site over the years has had a huge impact on my mental health and the thought of actual building work happening horrifies me!
Especially the size of the proposed plan.
Huge over development I feel.

If this application is approved it's going to be hell for us and ALL surrounding neighbours, with the mess, the Lorrie's, vans etc with parking, which the homeowner will not even consider when they are blocking driveways and pavements which will happen as it has in the past.

Thankyou for listening.

Kind Regards,
