RE: APP/20/01005

Dear Mrs M Houghton

I am writing to you in reply to your letter stating an invalid planning in relation to a tree preservation order relating to the above reference.

On your letter you have stated you require confirmation of the number of branches to be felled and the amount of the branches that is to be felled, please see below list relating the trees;

Following another review of the trees in good daylight this is the final list of work that will be required.

Oak T1 – X
Oak T2 – X
Oak T3 – X
Oak T4 – 2 branches to be reduced by 2m in length each
Oak T5 – 2 branches to be reduced by 2m in length each
Oak T6 – 8 branches to be reduced by 3m in length each
Oak T7 – 4 branches to be reduced by 3m in length each

With this letter on the email I have also attached pictures of branches over hanging my roof.

Image 1 – Oak T2 branches over hanging roof
Image 2 – Oak T4 branches over hanging roof
Image 3 – Oak T4 (to show size)

Branches that are being removed are on the south side of all trees.

As previously stated the reason for the need to fell the above branches are during acorn season, acorns can be heard smashing on to the roof waking us up and possibly causing damage, and that acorns and leaves are filling the guttering on the north facing side of our house which will cause damage if not rectified.

[REDACTED]

Yours Sincerely

[REDACTED]
