

7 MAR 2023

RECEIVED

[REDACTED] I have enclosed a sample of the cladding. It is locally sourced from a company 'English Woodlands Timber' and the Douglas Fir is from locally grown trees.

The planning application is indeed for just rendering and cladding the surface of the new extension and garage. I would also like to render and clad the existing house for some continuity.

The cladding will fade naturally and turn a light grey colour. It has its own natural oils which negates the need for woodstain/varnish.

Signed:
