

To Whom Concerned:

I am writing in respect to the subject of Tournebury Woods Estate which I am lending my total Support.

Due to this wonderful venue, I have not only enjoyed supplying my service to many couples getting married there but it is also a big foundation to the financial flow for my company thus supporting my family every year.

In respect to the type of customers the venue attracts, I have never witnessed one single incident of trouble which speaks volumes on the atmosphere Generated. I also haven't seen any rubbish generated outside of the Marquee so it is always spotless.

As for the team that run the day to day operations, They are excellent!

The biggest and most notable part though is the amount of time and money that is spent keeping the grounds in excellent condition and the respect to any near neighbours. I have never worked or heard a sound system like the one installed in Tournebury and I have worked in hundreds of venues over the past 22 years some with sound limiters or neighbours that complain and those venues have not gone to anywhere near the extent of Tournebury on sound proofing plus inbuilt ceiling system. To sum up the sound system, if you step on the dancefloor, its loud, but as soon as you take one step off you can hardly hear it! As a DJ this means I have to mix through my headphones. Outside once again with any party going on you can hardly hear the sound system.

This venue really is a gem due to it's owner and teams Hard work and provides so much for so many in lots of different ways.

Regards
