

Dear Mr Toole

I am writing to "object" to the planning application put forward by my neighbour at number '8' Ingledene close.

This addition of a rear Dormer will mean I lose all privacy in my garden as this will give 100% access to views into my property.

and look forward to the better weather when I can just sit in the garden and listen to the birds knowing its all very private + safe.

and Sitting in the garden is one thing, So look forward too.

I have already lost much of the light to my bedroom because the neighbours have parked a large Caravan and mobile home on the very small parking areas these bungalows afford. Its distressing to think I will now have issues at the back as well.

I have been advised my neighbour should be addressing the "Party" wall act, but I have not been approached about this. Which concerns me not least because the other building work he has done is not complete and structural timbers have been left open to the elements for 3yrs now! With only 2 people living in the bungalow I really don't understand the need for these alterations,

Concerned

Kind Regards
