Dear Sir or Madam,

Southern Water Services Limited - Discharge of Condition 4 (Reinstatement Methodology) of planning permission APP/23/00004 - Temporary use of land to carry out ground investigation works comprising the drilling of 2 no. boreholes at: Pavilion, Bidbury Lane Havant.

I write with respect to the discharge of Condition 4 as applied to planning permission ref: APP/23/00004. This planning permission allowed for the installation of 2 no. temporary monitoring boreholes within the grounds of Bedhampton Mariners Cricket Club, in connection with the Hampshire Water Transfer and Water Recycling Project.

Condition 4 requires the submission of a scheme for the removal of the boreholes and the reinstatement of the affected playing field land. Condition 4 was partially discharged during 2024 following the approval of a scheme for the reinstatement of the land affected during the installation of the boreholes (temporary compound and access route) by Havant Borough Council.

The enclosed information refers to the reinstatement of the land affected by the removal of the boreholes and will enable the full discharge of Condition 4. Please find enclosed the following:

- Hampshire Water Transfer and Water Recycling Project, Decommissioning BH101 & BH102, Bedhampton - Method Statement

The enclosed Method Statement sets out that the affected areas of the playing field will be reinstated in accordance with the Sport England 'Design Guidance Note – Natural Turf for Sport' and the England and Wales Cricket Board guidelines 'Recommended Guidelines for the construction, preparation and maintenance of cricket pitches and outfielders at all levels of the game'. The removal of the boreholes and reinstatement of the affected ground is scheduled to commence from 2nd June 2025.

I trust that the enclosed Method Statement is sufficient to enable Condition 4 to be fully discharged, however please do not hesitate to contact me if you would like any further information.

Yours faithfully,

Principal Planner, Southern Water
