

Last Wednesday the UK government announced that they would not allow any more houses to be built on GREENFIELD sites. This is a greenfield site, and It is therefore imperative that Havant Borough Council reject this application.

If they allow the development to continue then we will have hundreds of houses but Chichester Harbour will still be covered in green algae:

ALSO

I have had the privilege on many, many occasions to see a herd of deer grazing in the site field:

Unfortunately deer can't eat concrete!!
