Dear Mr Fares

Site address: 50-56 Creek Road

Proposal: Addition of first
floor to create 2 flats

With reference to the proposal to develop 50-56 Creek Road we would like to outline why we feel this construction should not be permitted, particularly as we live directly opposite the shop.

Given the suggested length and height of the new building it would impinge on our lifestyle by reducing the amount

of light entering our property and overshadowing us on both floors of our house.

We are already overlooked by customers visiting the shop such invasive and creates a loss of privacy and we dread the prospect that this will become much worse with the new proposal.

Assuming the development goes ahead we can envisage parking in this part of Creek Road becoming far worse, especially on delivery days at the shop. At times it is of monumental proportions at present which is bad for such a narrow road. Obviously this would affect highway safety and the volume of traffic and associated noise and disturbance would greatly increase.

We have already had our front

Wall demolished by a customer's car leaving the shop and we feel it is perfectly possible for that to occur.

We moved to Hayling Island for a better and more peaceful lifestyle and given what is suggested that will become a distant memory.

We are not young people

hence the move to the area and we believe the advantages we have gained by coming here will be null and void if the development is allowed to go ahead.

Yours sincerely,
