Two storey side and single storey front extension. 34 Cornbrook Grove, Waterloo, PO7 8RD

Dear Mr. Toole.

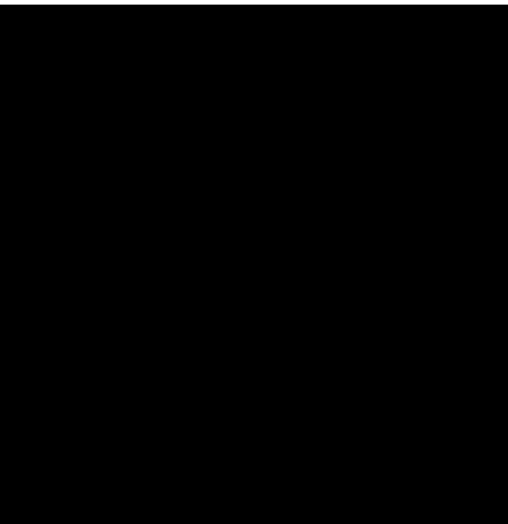

Further to my letter of 29th. October, I would like the attached information added to my objection to the application.

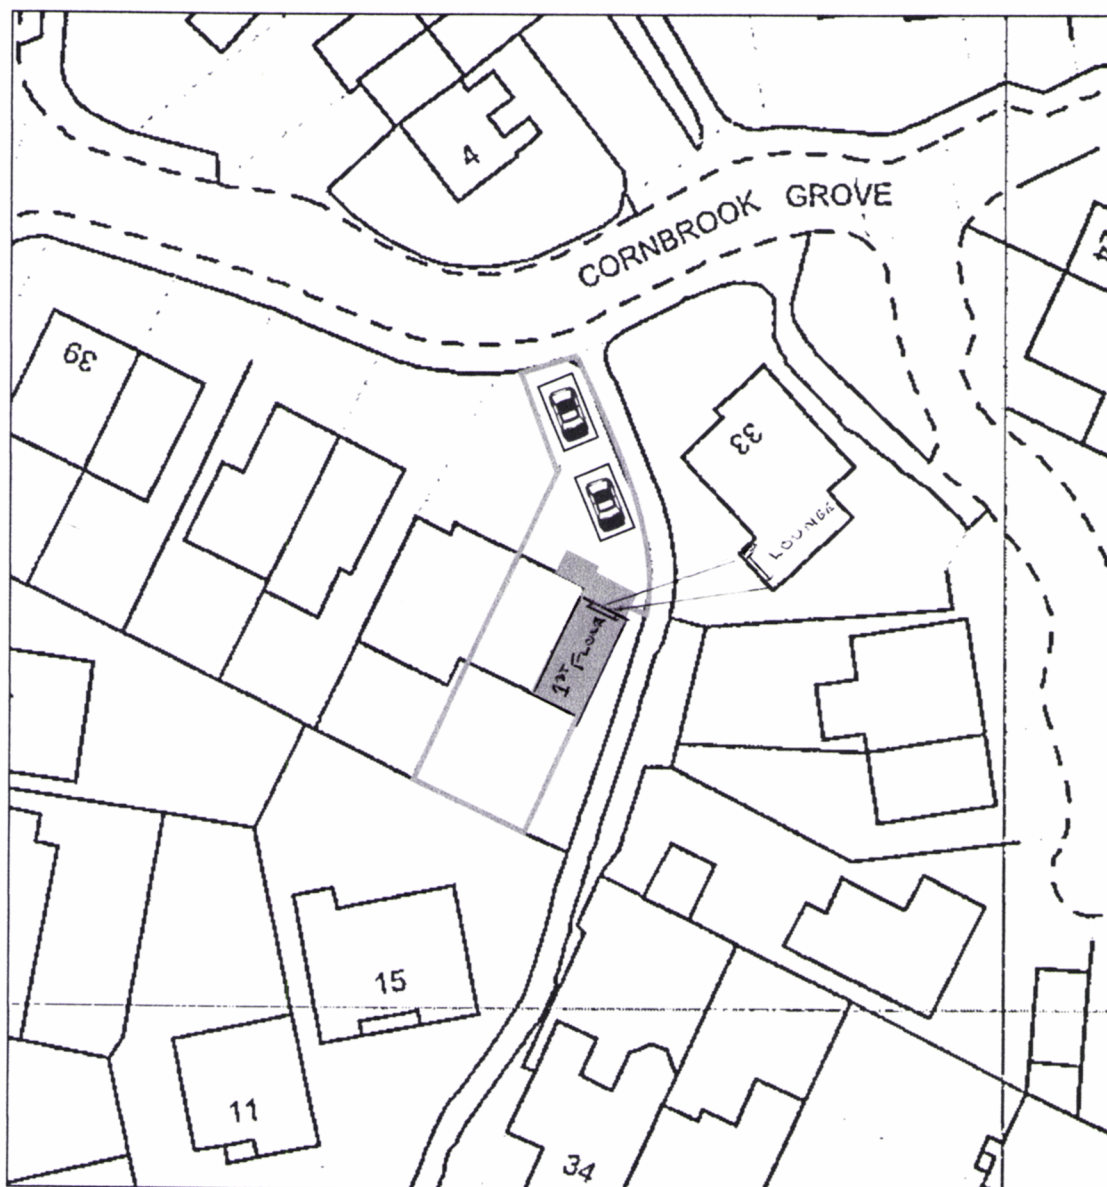

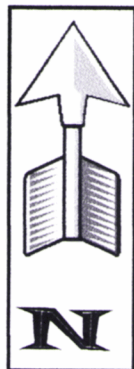

The 'line of sight' projection added to the site layout plan clearly shows that the north facing first floor window of the proposed extension will give an unacceptable view into my rear lounge through the picture window. The window will also give a clear view into the SSW facing area of my garden totally removing the privacy it currently affords.

I also have taken a photograph (copy enclosed) of the current view, from a seated position, of number 34. I have overlaid the picture with an outline drawing of how I think the same view will look with this monstrous extension in place. It is possible to imagine from this picture just how the sunlight will be obscured when the late afternoon sun is in the southwestern sky. The first floor window would also clearly be seen from the lounge.

If you are minded to approve this application I wish to be notified so that I can attend the planning meeting to express my views in person.

Yours Sincerely,

LINE OF SIGHT FROM PROPOSED WINDOW TO NORTH.
