FAO: Suzanne Greenwood – Environment Agency

Dear All at HBC & WCC,

Ahead of a formal submission for the discharge of Cond 17 ref: 05/40000/000, I attach our landscape designs for the diverted stream scheme at Old Park Farm, Waterloooville. These designs include the diverted section of stream and also the open space corridor of land which follows the remainder of the retained stream which ultimately connects to the larger western open space.

As per our previous discussions we have sought to create a meandering, naturalistic form to the diverted stream, with channel profiles which mimic naturally occurring meanders, berms and scrapes. A series of ecological features have also been included within these designs; including bat boxes, hibernacula, deadwood piles, stony pools / riffles and a series of native tree, shrub and marginal plantings.

Please do pass on any initial comments / thoughts,
Regards,
David
