Dear Nick,

Further to our conversation just now, please find some details below, which I am happy for your to forward to Havant Council:

- The scheme involves creation of a wetland area to remove nitrates from water that is flowing into The Solent.
- Natural England have approved the scheme for the Havant area and anything draining into Budds Farm.
- Details can be found at www.meonsprings.com/wetland
- We currently have over 1500 kg/TN/yr remaining capacity on our scheme.
- Details of our planning permission and S106 can be found here <https://planningpublicaccess.southdowns.gov.uk/online-applications/applicationDetails.do?activeTab=documents&keyVal=Q7G535TUM0900>
- SDNPA are monitoring the scheme.
- The scheme is backed up by removal of land from production, should the wetland not cover the allocations.
- We are happy to offer 122 Kg/TN/yr offset for your proposed development.

Please let me know as and when you need anything else.
