

ref: APP/22/00872

I writing in conjunction with the Planning application for 93. Winterslow drive PO9 5DZ of 2 No2 bed houses. We strongly disagree with these houses being built. This corner of the street is already very over crowded already the 2 No2 houses would mean more occupants which will mean alot more noise in this small space and area.

And as for parking its already a safety issue with parking already let alone adding more cars to the mix people cannot park as it is around here. Cars park over our drive way we constantly get blocked in and also cars drive up the pavement from where this property would be onto our drive and this is a serious risk as at times my grandchildren have been out front to get in car and have not noticed cars which is only a

matter of time before someone gets  
knocked down.

When theres bad  
whether where we a on  
a slope this corner always  
gets flooded with not  
much soak away this  
could be a bigger problem.  
These houses are not  
going to benefit anyone  
who lives here only  
going to make every  
on going bad situation worse  
and parking will be a  
serious safety issue.

Thank you
