

For the attention of Mr. J. Toole

Dear Sir

Further to our telephone conversation this afternoon  have the following objections/comments to the above **proposed** planning application:-

1. The proposed ground floor extension will severely reduce sunlight and privacy to our back garden.
2. The first floor extension will reduce tenants privacy with the new side extension and the re-positioned side-window.
3. The resultant increased noise level is also a cause for concern as it compromises mine and the tenants rights to 'quiet enjoyment of life'. Particularly as a lot of people are now working from home and this will disrupt their livelihood.
4. I am unhappy having only just heard today 15th March, about these proposed building works. It raises my suspicion concerning the legitimacy of my neighbours proposed building plans; why else would they not have been in touch to advise us prior to this?

Should you have any queries, please do not hesitate to contact me.

Kind regards
