

12th July 2020

Mr J Toole
Planning Development
Havant Borough Council

Dear Mr Toole

**PROPOSED LOFT EXTENSION AT 25 CHARLESWORTH DRIVE (resubmission)
Ref: APP/20/00501)**

[REDACTED] I am writing to register my objection to the above Planning application. My grounds for this objection are as follows:

- The revised plan includes an extension to the roofline, with dormer windows impacting on the street view and character of the neighbourhood which has only the original pitched roofs on this part of the street
- These dormers will block the light to the east side of my property, casting a shadow over [REDACTED]
- The windows on the dormers overlook my property, in particular the revised plan includes a bedroom window which will provide a direct line of sight onto my back garden, patio and kitchen
- The revised plan includes dormers which extend above the existing rear extension, a significant increase in size for this property, far beyond the size of the original dwelling and the properties surrounding
- An increase in vehicle parking due to the increased size of the dwelling, which will likely spill over onto the road, potentially causing road safety issues

I note that work has not ceased at 25 Charlesworth Drive, indeed the building work has continued throughout, the noise and disruption has caused considerable stress [REDACTED]
[REDACTED]

This resubmitted Planning Application does not address the original objections to the previously refused application (APP/20/00137). The dormers, whilst somewhat changed remain substantially oversized for the area and style of house. The revised plans still include windows which compromise the privacy [REDACTED]

Yours sincerely

[REDACTED]
