Mrs K Wooden site address

40 Bushy Mead PO7 5DY

Dear Sir/Madam

I totally object to the construction of a double garage which is directly on the north side

Of my garden, this would block our outlook and natural light with a height of 3946.44

To the top of the apex roof which is unacceptable.

Mr Ferguson told me he was building a wall on the boundary of my garden then leaving

A gap of about 7 feet on my side then he was going to build a garage with the rest of the land

But this has now changed to the garage being built on the whole of the land which is why I

Object to this construction.

The foundations which has been laid for the garage and the outbuilding which is also being

Built is what you would lay for living accommodation and not for these type of buildings so I can

Only guess this is what he is planning for the future to change the use of the buildings.

Another factor is the noise and fumes from the garage plus the health and safety of potentially

Having vehicles with gas cylinders stored in them from his business.

The whole site seems to have too many buildings and not a lot of space I can only

Conclude that this is very bad planning.

This construction of this garage would also devalue the price of my property.

Your faithfully
