

The beech tree trunk is leaning in from Parkwood over the gravel access drive of Treeside Way at an approximate angle of 18° to the vertical:

There is no desire to reduce the crown by lifting or height, as was noted in section 7 of the original application. The wish is to take up to 2m off the widest part (5.3m) to clear the drive and with a secondary benefit of attempting to rebalance the tree and try to correct its lean.

Currently its canopy extends as below:

The tree is to be trimmed so that it might be closer to the following diagram, though this is a rough guide and will be based on the tree surgeons expertise in situ.

Expected situation:
