FAO David Eaves

Further to my recent email and our telephone conversation, I am writing in on behalf of NEHRA regarding the above application. I understand it is not on allocation land for housing, but represents significant number of houses for the Island to accept, should it be approved. We are very aware of the infra structure problems, which affect the whole Island. First and foremost the traffic situation on the approach to the Island, which is effectively a cul de sac, and the flow of traffic prone to seizing up, at the slightest problem, where it is already at full capacity. We understood that there will be a full infra structure survey and report, before any more housing developments are approved, and hope that this will be the case, even if there are delays before it is set up. We will, I am sure be re-iterating what many others have said, that this application should be refused for these reasons.

Regards

Judy Clark NEHRA
