

Subject:

Ref: APP/20/00134 Two storey side extension

Your Ref: APP/20/00134

We hope you can help us with our concern, I got in contact with your department last year and was told someone would come and see us but no one did. My husband and myself have concern about a land drain that runs [REDACTED] via 1, Copse Close, Waterloooville PO7 5JS, [REDACTED] We have tried to find out where this drain goes but we have no information and no one else seems to know either. We have worries that the build that 1, Copse Close intend to do could cause us to have flooding problems if our drain becomes damaged or blocked, we have noticed even more this year especially with the rain we have had these last few months. Living on a slope means we get a great deal of drainage off the golf course directly behind our garden. We have no objections to the build, we just need them to know our problem. Look forward to hearing from you.
