

8 Billett Avenue,
Waterlooville,
Hampshire.
PO7 7SZ.

[REDACTED]
L.Oliver, Planning Dept.

Dear Sir,

Your ref' APP/18/00109.

Land Adjacent to 15 Billett Avenue.

We most strongly object to the above, as follows;

Despite the title Billett Avenue is a single track unadopted lane edged by soft verges and with no discernible means, or system, of dealing with rain water.

This proposal for the end of the Avenue is a skewed entry with no apparent turning ability for any vehicle. Currently, even under normal conditions, cars, vans, trucks and lorries all attempt to turn using resident's driveways. We have on many occasions have had to ask drivers to clear our frontage/drive where their transport has wrecked the surfaces and our ability to leave our property. Verbal abuse is therefore not uncommon. So if this level of dreadful in-fill is permitted how we get an ambulance or fire/rescue with additional four houses and at least four, possibly eight, cars added is a deep worry.

From around addresses 2E, and opposite 3, along to this proposal, the 'avenue' surface is maintained by each householder and is a constant concern and expense. Inexplicitly granting the above **must** therefore include a legal requirement for the developer to completely resurface the road on completion, irrespective of present multiple attempts at repairs. No item in the proposal (as yet) covers this or subsequent damage.

You may also know that we have no street lights and to date we are surprised that there have been no accidents. People currently weave up and down using hand torches and this in 2018!

To conclude we do object to the above proposal on many aspects, just the main ones are high – lighted above.

We look forward to sensible conclusion.

Yours faithfully,

[REDACTED]
T.M.James
