19th April 2017

Dear Development Services Manager,

Your Ref: APP/17/00336

31 Christopher Way, Emsworth, PO10 7QZ

Thank you for informing us of the proposed building alterations/loft conversion to No 31 Christopher Way in Emsworth.

Whilst we wish our neighbours well with their proposals we are concerned about the safety of road users during the building period.

No 31 had building work carried out in the latter part of 2016. The gentlemen concerned parked their vehicles with little consideration for neighbours or other road users. We had difficulty entering and exiting our own driveway.

More importantly, Christopher Way is a through road to St. James Primary School. At the beginning and end of the school day, Mums, prams, children, scooters and bicycles use the pavements with varying degrees of attention to cars and passing traffic. It is a hazardous time. Parked vans and trucks add to the danger. On occasions last autumn there were three trucks awkwardly parked forcing cars to swing close to the pavement as they turned the corner from New Brighton Road.

We would request of HBC that due attention is paid to this Highway Safety and Traffic issue.

Yours faithfully,

Olivia Pembrey

Catherine Hargaden
