**Subject:** Planning Appeal: APP/X1735/Y/23/3321346

Dear Sir/Madam,

I wish to support the Appeal that concerns the above Application, that is made by Dr. N. R. Ogg against Havant Borough Council's (hereafter HBC) refusal of Listed Building Consent (hereafter LBC), for the replacement of 6 windows in the Royal Apartments, Sea Front, Hayling Island PO11 0AD.

I consider HBC's refusal unreasonable for the following reasons:

1. Several precedents exist where LBC has been granted for replacement windows in the Royal Apartments.
2. The appearance of the building will be enhanced by his proposal and its character would be preserved.
3. This would benefit the public enjoyment of this building which unfortunately sits in an area which is otherwise badly run down and neglected. Residents should be supported in their prudent and careful efforts to make their part of the building appropriately habitable to a more modern standard. Otherwise the property will eventually fall into decline, its living conditions unacceptable in the modern age when we all expect a reasonable degree of both warmth and protection from the elements; this is true for all ages of residents.
4. Double glazing will enhance thermal efficiency, which is essential in this officially recognized period of climate change, together with spiralling energy costs and fuel shortages. Every level of government is tasked with commitment to energy savings and radical reduction of heat loss for all buildings whilst still ensuring that they are habitable. For all these reasons, to refuse this simple and attractive economy is therefore unreasonable.

Please acknowledge receipt of this email in support of Dr. N.R. Ogg's Appeal.

I look forward to reading your considered response in due course.

Please also note that this email is my personal support in this matter but my considered view is the result of a long period evaluating and, where appropriate, openly supporting local residents' complaints regarding their personal situations as these are affected by, amongst other factors, policy and regulatory decision making. My experience is the result of my long-standing voluntary work as Chair of Hayling Island Residents' Association and I am supporting this resident complainant on this basis.

Kind regards,
