

Dear Sir,

Ref APP/19/00589 - 62, Silvester Road Waterlooville PO8 8TS.
For the attention of Mr J Shaw - Case Officer.

Dear Sir,

I refer to the application referred to above.

With regard to the proposed first floor extension over the existing ground floor of 62, Silvester Road ; I have examined the drawings/plans available online and raise objection to the proposal as follows;

At present there are "standard" sized windows at the rear of 62, Silvester Road which afford a limited view to the rear of my property.

The first floor extension, as proposed, would bring the window line in the extension closer to the our common boundary and the proposal is for the installation of a very large "floor to ceiling" window area. I note that the proposed window installation is for anthracite grey glass which would allow a view out but not in.

The proposed window area would directly overlook the rear of my property, including the patio and seating area immediately at the rear of my house, my glazed patio doors (which would give a view into my living area) my kitchen window and the majority of my back garden. Because of the "floor to ceiling" nature of the proposed installation there would be a far larger field of vision onto my property than at present and the view would be constant for anyone virtually anywhere in the room behind the proposed window.

My submission is that the size, design and appearance of the windows, as set out in the proposal for the extension, would be overbearing, give the impression that I am being constantly overlooked and most importantly have a seriously detrimental impact on my privacy. I would therefore ask that the proposal in its present form be refused.

I would welcome a site visit, if it would be helpful.

Yours Sincerely,
