Dear Madam

Food Safety Act 1990/EC Regulation 852/2004
Health and Safety at Work etc Act 1974
Planning Application No:
19 London Road, Widley, Waterlooville, PO7 5AS

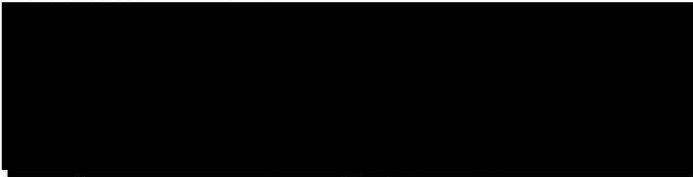

I refer to the above application forwarded to Environmental Health for comment as part of the consultation process carried out by the Planning and Development Service.

The Environment Team in Environmental Health will make their comments concerning matters such as odours, noise, loss of amenity, etc, directly to the planners. I wish to comment on the requirements of the Commercial Team in connection with the requirements of the above legislation.

It is noted that the internal layout does not include sufficient detail. Should planning permission be granted the applicant or persons engaged in the food business are advised to contact the EH Commercial Section with detailed proposals for the premises. The proposals should include matters such as lighting and general ventilation to all areas, food storage, washing facilities including 2 sinks and 1 basin within the food preparation areas (for hand washing) and any provision for staff such as changing facilities.

Whilst the above does not have a material affect on the planning process (except possibly windows or extraction system in connection with the provision of ventilation) there are specific requirements under the legislation for food businesses.

If you require any additional information or advice on this particular matter, please do not hesitate to contact me at this office.

Patricia Christie
Food and Safety Officer
Environmental Health - Commercial Team

cc. Planning Officer: Kayleigh Taylor
