Commenter Type: Complainant

Stance: Customer objects to the Planning Application

Comment Reasons:

Comment:# although everyone needs somewhere to live,we all need to live with the knowledge that if we need to use the emergency services whether it be fire police or ambulance it will be there for us, at present there can already be a long delay in their arrival because of the congestion on the road of Hayling with more housing the services will have more delays then they have already.

there are not enough school places for children on the island now,many new pupils will have to travel to schools causing more traffic congestion leading to more delays for ambulance service etc,delays for parents getting to their children at school in an emergency off of the island whilst at school.

#there are not enough drs on Hayling island as it is,drs now are being expected to see more patients then is practical, leading to the possibility of mistakes and breakdowns.

over the years of both working and living on the island I have heard of many times someone has needed an ambulance only for it to take too long to arrive.My husband is now one of those possible people waiting for an ambulance h

As I said at the beginning of this comment everyone needs somewhere to live but the infrastructure has to be safe and capable of coping with the extra pressure put on it,please take all of this into consideration when reviewing the application for new housing.
