

Re Planning application AP 2400876

Thank you for your visit and information supplied.

I was disappointed to see the council are still using an inaccurate plan of Pastoral,

The fact that this goes ^{on} ~~off~~ line, and I assume to various council departments means that nobody has a true picture or facts of the application. This is not acceptable.

The question of the fire hazard and the adjustment of the carport 

 having seen a car catch fire and coming close to burning down a neighbour's house.

I am still unhappy with the position of the proposed new position.

When I mentioned the fire hazard you said that if was not your department that deals with these things, would you be kind enough to pass a copy of my letter dated 26.11.24 to the appropriate department.
