Dear Sir/Madam

Re;- Planning Application-Proposed workshop @
34 Lister Ave

Over looking my garden I have a great oak tree & silver birch. Both doing good for the environment. My garden most of the day is in the shade.

However, there is a gap between the two trees that I am able to have light through.

~~This~~ last year, 34 Lister Ave put up a building which is really hidden behind my lavender tree.

Sorry to say the proposed building waiting for planning permission will definately cut out my light and certainly not look as good as the Great Oak & Birch Tree.

Obnoxious sights and dark dull gardens are not place's anyone wants to retire too.

The two wonderful tree's will need to come down for that type of planning permission to be approved.

Alternatively, they dig deep into their garden, then build workshop so that the roof line can follow the fence line.

Another concern I have is about rain-water. There is a difference between land levels, my garden is lower.

On my demise - No other person would want to buy this property at the market price because of the exclusion of light.

Regards
