

26th Nov 2021 .

Dear Miss Donophy,
Re; 26, Bracklesham Road, Hayling Island
Proposed second storey extension with balcony. Replace balcony and Spiral staircase etc. Your ref: APP/21/01203

Can I bring your attention to increase height to front wall and gates.
I feel that allowing the front wall to be raised any higher as to the existing wall and gate height would be a detriment to that part of the road and other properties on that side of the road or in other words it would not be in keeping with all the other properties.

I can only assume the owners have applied for this for privacy reasons but obviously have not considered people living on the other side of the roads privacy or outlook with regards to the application for second storey extension and balcony.

So in short I am appealing against raising the height of the front wall and gates. As a footnote we have had a lot of extensions as is being proposed and repairs to pipe work etc done down this road in the past few years which has involved the destruction to our grass verges and interference to our getting in and out of our driveways by builders parking on the verges and cutting the grass up, to be honest with you we are sick of it, there is ample parking at the rear of the properties where this work will be carried out, can you please inform the new owners of no.26 of our concerns.

Yours Sincerely
