

12th April 2024

Planning Application for 34 Pennant Hills, Havant PO9 3JZ

Ref: APP/24/00191

Demolition of existing garage, Erection of second storey on front elevation, part two storey and part single storey side elevation extensions

My objections are as follows:-

- It will dramatically change the style of the street with its open spacing between properties and well kept garden areas.
- The new owner has already raised to the ground most of the area around the current house removing trees and put in a lot of hard standing. This will effect drainage in the street and the bird life.

Ref: APP/24/00190 Erection of 1 No four bed shelling

My objections are as follows:-

- The vast increased congestion in the street on a tight busy corner is a safety issue both in Pennant Hills and out onto the main road.
- The whole design, appearance will not be in keeping with the rest of the street and the small remaining tree and garden area in the property will go in detriment to the wild life and general aspect.
- Effects on the drainage with the loss of foliage and the ground covered by buildings and hard standing.
- The owner has already transformed what was a garden into what looks like a builders yard.

Yours faithfully
