Your Ref.: APP/23/00583

Dear Sir or Madam

Comments on revisions to Planning Application APP/23/00583, 76 The Brow, Waterloooville, PO7 5DA

The comments regarding the location of the solar panels at [REDACTED] The Brow made by Phil Laurenson of ADP Architects are incorrect.

The original plan was to place the panels higher on the west facing roof but it proved impossible at the time of installation.

The maximum number of panels (3) was installed on the south facing roof at the same time as those on the west facing roof (8). The south facing roof is significantly smaller than the west facing.

The sun survey refers only to hours of sunshine not daylight hours. The panels do produce electricity even on a cloudy day. The reduction in daylight/sunlight will lead to an environmental and financial loss.

Yours faithfully
