Please provide the following information below: tree species (and the number used on the sketch plan) and description of works. tree name	yew
work being applied for	reduce crown. To north by 1.5m. To south by 3.5m. To east by 3.0m. To west by 3.5m. No height reduction.
reason	primary limbs are becoming excessively heavy and some are poorly attached. Tree has a long standing Laetiporus presence which will be causing decay. Risk of primary limbs detaching needs to be controlled by reduction work, for safety reasons and for long term well being of the tree by developing a smaller denser crown.
