Supporting the application for change of balcony windows flat 4 49 Sea Front Hayling Island Hants
PO11 0AN

The existing balcony French windows (3) are the subject of an improvement order in respect of the ingress of draughts. The replacement windows to be made of wood and are similar to others in the crescent. The double glazing will be unobtrusive and following advice from Havant and the window suppliers, the glazing will be 4-6-4 toughened.

Heritage statement

The initial construction was started in 1822 approx, regrettably the crescent was never actually completed.

In 2012 the existing windows were replaced with single glazed glass as the frames had rotted. Permission from Historic buildings was granted before the frames were installed. The proposal will preserve the current look of the windows but with the addition of double glazing. The hardwood frames will be painted white.
