

< Privett Road / car Port

This statement is addressing the reasons for refusal outlined Case officer decision.

We have lived at 9 Privett Road for over 20 years now , it's a great community and our neighbours are supportive of each other when It comes to improving our homes & lives .

Firstly I would like to state why the car port was erected .

[REDACTED]

[REDACTED] Due to the pandemic I was unable to financially support storage for my boat and classic car . This is when I decided to build the car port , my interests in life are limited now due to my capabilities however my boat is something I enjoy and can continue too baring in mind shielding / and consideration I have to consider regarding covid . This is something that also supports my mental health whilst

[REDACTED]

I also think it's important to know , as it is for me I have invested a lot of time and money into my home . I'am not in the position nor would I want to move home , and want to retire here .

< Privett Road / car Port

We would like to highlight that our adjoining neighbour number 11 has resided for the same amount of time at Privett road . Firstly I think it's very important to state that they have no issue with the car port .

So therefore at this point we need to clearly state that the statement in relation to number 11 and any impact the car port might have is the case managers not theirs .

There is no restriction of light that would impact on number 11 , and to mention not to us either . We erected a polycarbonate roof , this shows that we considered these factors before construction. I do question how this was reached as an issue , when it doesn't exist . We have spoke to the residents of number 11 (and number 7)and they have no issue of any sorts. (No objection have been submitted to support this matter ).

< Privett Road / car Port

Another reason for refusal stated , is that the car port does not fit in with the character .  
If , the case officer that reach this conclusion did attend a site visit I find it very hard to understand how this thought was reached .  
Privett road has a number of variable properties, where appearances are so different - so we totally disagree with this there is not one property in any shape of appearance that matches another in privett road . We feel that this statement is a preference of opinion, there are no facts or objections to support this.

These points that have been raised to reach a refusal of permission , have no substance in our opinion. We also feel that due to no objections from any neighbours show that the car port is not issue .

Thank you so much for taking the time to reconsider the decision .

We look forward to hearing from you .

Kind regards

Mr & Mrs Ware
