Dear David

Bartons Road, Havant (APP/20/00658) – Highways Update

The purpose of this letter is to provide an update on highways matters relating to the above planning application.

We, Paul Basham Associates, have been liaising with Hampshire County Council's (HCC's) Highways Development Planning team regarding the final outstanding highways and transportation issues relating to this planning application ref: APP/20/00658.

On the 4th July we agreed with HCC that the following final changes were required to the drawing pack which accompanies the planning application:

- **Drawing 008** – 1.5m visibility splays added to Bartons Road pedestrian crossing point;
- **Drawings 100-103** – notation added stating 10mph drive speed; and
- **Drawings 300-303** – updated layout which ensures parking spaces are not within visibility splays.

These minor changes have now been made and the final drawing pack was issued to HCC on the 8th July. We have been told to expect a formal response from HCC within the following two weeks.

We cannot know the exact contents of HCC's upcoming formal response. However, based on our recent liaison it is understood that all of HCC's transport concerns have now been addressed. We are therefore anticipating a lifting of HCC's objection shortly.

The final drawing pack, as well as final layout, will be sent to you with this letter.

Yours sincerely

Alex Stephenson
Principal Transport Planner
