

7th February 2021

Dear Sirs,

RE;
APP/21/00085

With reference to this application. Though a very considerable improvement on the former application I would still consider the extension above the garage to be bulky and overpowering in the context of surrounding properties.

It is inevitable that with three rear windows there will be a considerable area of view over my own garden which is unfortunate.

The submitted drawing of the existing property is incorrect and confusing. The conservatory was demolished Oct/Nov, ground work of some sort undertaken, and a rear extension has been built. Although not completed it is glazed and roofed so presumably inhabitable. This extension has a door rather than a blank wall facing towards myself. Similarly, the front forward window has been bricked up leaving a different set of three windows than as shown in the proposal. A front bay window has been added also.

Yours faithfully
