

[REDACTED]

To whom it may concern,

The summer house that I have put up is on the same foot print as the original shed that I took down.

I have been careful to use natural materials for most of the summer house. The doors match the house in appearance and as you can see by the enclosed receipts , I have had them specially made , shorter than normal to keep it as subtle as possible.

There are many such sheds/Summer houses/ offices that are of similar stature in neighbouring gardens. Therefor I did not see this as an issue.

The space will be used for my daughter to study in , extra storage and a general family office.

[REDACTED]

The summer house falls within the boundaries that I found online of permitted buildings in any given street , however I didn't understand the constraints in our new build estate.

I have enclosed a finished pic, and some drawings of the dimensions. I hope these are acceptable.

Kind Regards
David Sykes.
