CAUTION: This email came from outside of the council - only open links and attachments that you're expecting.

Dear Ikrame

Thank you for your email.

I can confirm that the LED display within the scoreboard does not flash. It is a static display.

I would also point out that a large, dense conifer tree screen surrounds 3 sides of the pitch preventing any issue/perception of glare.

The nearest house (next to the clubhouse) also has a tall hedge to its garden, again screening views of the scoreboard, for the very limited time it is in use, mostly being times of daylight, with only a few occasional evening matches played in the season.

The Club does now hope that with this further information you will now be able to quickly, favourably determine the planning application under Officer delegated powers.

Kind regards
