

[REDACTED] we have no objection to the reduction of 1 poplar tree situated behind 29 Coronation Road PO7 7FA but we wish to make the following observation.

We moved here in 1999 when the row of poplars were all trimmed to the same height which looked very attractive. Over the years some poplars have been reduced in height. Why are they no longer trimmed to the same level at the same time? This line of poplars now looks shambolic.

Kind regards

[REDACTED]
