Subject

- Application for planning permission Ref AAP/19/00729 12 Dibden Close Leigh park po9 4bb.

- I OBJECT to this application on the following grounds

- having viewed the proposed plans for this application I object to it on the following grounds.
- Parking is already at a premium in the close which provides parking for not only the residents in Dibden Close but also those of Appleshaw green who have no parking facilities close to their homes and some residents of Hordle Rd. I see by the plans submitted that for parking spaces will be provided within the boundary of 12 Dibden close but. this also means that at least one existing parking bay will have to be removed to allow access to them, while this would appear to help the parking shortage it does not allow for family or friends who will no doubt visit the properties. If permission for this application is granted there will be another problem created for the residents of the close, the access Rd into Dibden close is not wide enough for two vehicles to pass meaning that access and egress to the residents will be curtailed while contractors vehicles are delivering and unloading materials to the proposed site also concractors will take up valuable parking spaces while the building is under construction.
- The plans show that the parking spaces in front of 12 Dibden Close will be in the existing front garden, which means that my lounge window will be one meter from any exhaust fumes caused by cars being parked, manoeuvred or left running which therefore means if I have my windows open I will be subject to exhaust pollution in my own home, [REDACTED] this will in effect my health and not being able to use my own lounge. I will also be subjected to car headlights shinning directly into lounge. Also having these parking spaces so close will SERIOUSLY DEPRECIATE the value of my property.
