

For the attn: Ms Daphney Haywood. - Case Officer
Reference application number APP/19/01141/
Proposed development at Hayling Island Sailing Club
Overflow Car Park, Sandy Point, Seafarers Walk,
Hayling Island.

I wish to make the following representation:
That the above planning consent is conditional
upon a management plan made with the consultation
and agreement of local residents together with those
individuals most affected by vehicles accessing the
overflow car park.

The access to the carpark is made via the Bracklesham
Road entrance and is a single track road now being
incorporated into the Coastal Pathway.

This is already a popular track used by the residents
HISC members and all visitors to access the beach.

There is no pavement. Cars and vans continue to
ignore the speed limit, many driving far faster
than the limit allows. It is a bottle neck. Increasing
traffic levels are now available due to the increased
parking available in the overflow Car Park. The two
are directly linked. In the summer the vehical
numbers are in the hundreds. I request that robust
solutions to this problem are to be included in
the management plan.

I thank you for your consideration of the
above matters.

Yours faithfully
