Re: Padnell Grange Proposed Development APP19/00224/

With regard to the above, this is my formal objection to the proposal on the grounds:

- 1> That it encroaches into the Havant Gap area & local green space.
- 2> That there is insufficient local infrastructure to cope with yet more housing - in particular an already overloaded & highly constricted single approach road.
- 3> That it would require the re-routing & upgrading of an existing Right of Way.
- 4> That it would entail the rescinding of existing tree preservation orders.
- 5> That it would undermine the character, aesthetics & nature of this tranquil area to its detriment. Local people & wildlife would be severely impacted by any demolition & construction.
- 6> That it is not indicated in any future development plan for the area.

Having lived locally for over 30 years, I feel this proposal is entirely out of character with the local area. My objections may be summarized as above. It is my strong belief that the planning officer should reject this application as highly inappropriate.
