**Reference** Barratt Homes resubmitted application APP/18/00724 – Application to Build 195 houses on field between North Shore Road and Sinah Lane, Hayling Island. I would like to add my comments to those in a Paper received entitled This Directly Affects You..

I have lived at the above address for just over 60 years and would like to comment further on the details enclosed. . This application has been turned down before and reasons have now change only because the internal congestion on the whole of Hayling Island has got considerably worse since it was last considered. Added to the points made in your paper are the fact that:

1. Schools on Hayling are now bursting with numbers.
2. In no way could the medical facilities on the Island, already overflowing, be enlarged on their present sites and are already inadequate
3. In both cases they would entail large numbers of doctors, teachers and support staff, for whom yet more accommodation would be required.
4. The current or planned infrastructure is inadequate
5. Access to the island via its one bridge, already overloaded, has recently been shown to be inadequate as has been proved by an accident, a fire and a pothole incident in recent weeks. Two of these gridlocked all roads surrounding Havant for some hours, including the M27 as far as Petersfield, Southampton and Chichester. Indeed any minor hold up north of Hayling Bridge can gridlock the surrounding area.

I fear any major building on Hayling would deter its current reliance on our main income from visitors and yachtsmen of varying type. Hayling has a lot to offer and cannot afford to lose any of them.

There is much more I could add that shows that Hayling Island is already nearly full up without unnecessary new housing!
