Please identify the tree(s) and provide a full and clear specification of the works you want to carry out. Continue on a separate sheet if necessary. You might find it useful to contact an arborist (tree surgeon) for help with defining appropriate work. Where trees are protected by a TPO, please number them as shown in the First Schedule to the TPO where this is available. Use the same numbers on your sketch plan (see guidance notes).

Please provide the following information below : tree species (and the number used on the sketch plan) and description of works. Where trees are protected by a TPO you must also provide reasons for the work and, where trees are being felled, please give your proposals for planting replacement trees (including quantity, species, position and size) or reasons for not wanting to replant.

E.g. Oak (T3) - fell because of excessive shading and low amenity value. Replant with 1 standard ash in the same place.

dash in the same place.

RECEIVED

### **T1 Beech**

We would like to take this tree down as it has already dropped a large limb on the neighbouring field, and has a large deep hole in the base.

### **T2 Holm Oak**

We would like to reduce the width of the tree from 9 metres by 3 metres leaving a finish of 6 metres.

This is to reduce the weight overhanging the neighbouring field / lorry.

The tree appears to have minor issues due to age and these works are intended to preserve it safely for as long as possible.

### **T3 Holm Oak**

We would like to crown lift the tree to 2 metres from the ground to prevent it growing into the water.

### **T4 Ash**

We would like to remove this tree as it is growing on the edge of the stream bank, is in poor health and likely to disturb when it fails.

### **T5 Poplar**

We would like to remove this tree as it is growing at such an angle from the edge of the stream bank that it poses a risk of disturbing it.

We do not intend to replace the trees we remove as the neighbouring trees will fill the space.
