

SITE ADDRESS (Proposed changes) UNIT 21 WREN CENTRE
PO10 7SU

Reference: WREN CENTRE APP/24/00137

Thank you for your email regarding proposed changes to the above unit.

I have previously submitted my areas of concern but need to reiterate and emphasise the following.

ACCESS

When the Wren centre was established - approximately 1990/91 the traffic wasn't such a problem and lorries were much smaller than the massive lorries on our roads today.

The Wren Centre is situated off Westbourne Road, a narrow road, Vehicles enter and exit (the only way in and out) often causing traffic problems.

The proposed changes would obviously mean more lorries and the public would be coming into an already congested area.

PARKING

Parking provision for the units was established some years ago but very little parking was made for the general public.

WORKING TIMES

 checked the working arrangements on the site.

The following are the working times :

Monday - Friday 8am – 5pm possible working a little later in the summer months

No Weekend working

The proposed treatment room would mean the general public visiting the site evenings and weekends.

[REDACTED]

have been unable to move as a lorry was blocking the exit.
The problem would surely be exacerbated with more traffic entering the centre.

The 'management' of the site is now via Vail Williams – various issues/problems have been raised with them.
