Dear Sir

Ref: Planning App. 16003/19

I refer to your notice of the possible residential development for Victoria Road and wish to register my objection as follows:-

- ① The subject field has poor drainage and frequently flooded by rainwater
- ② The loss of diverse flora and fauna through the destruction of hedgerows fields and trees
- ③ The proposed development will substantially increase traffic and noise pollution. Added to this the road is used throughout the year as an overflow car park for the windsurfers; combined will cause even more difficulties leading onto an increasingly busy Havant Road.
- ④ I live in Rogers Mead and getting out onto the Havant road is already difficult. Additional traffic from this

2/2.

New development will make a difficult situation even worse, with a serious accident just waiting to happen. If you grant this additional housing, the developer should be forced to pay for traffic lights at the junction of Havant road and Victoria road.

I hope these objections will be taken into consideration

Yours sincerely
