13 Grange Close
Denvilles
Havant
Hampshire
PO9 2QT

Dear Denise,

In response to your request for a parking survey covering 4 different times over 7 days in Grange Close, Havant for the above application number please find the attached Excel spreadsheet and photographic evidence.

The parking survey covered 2 main areas namely:

- The on street parking opposite numbers 15 and upwards, Grange Close, and
- The large parking bay on Grange Close

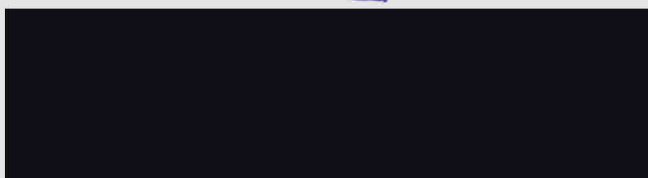

Based on your feedback that the turning head opposite numbers 13 and 14 Grange Close does not constitute on street parking this was excluded from the parking survey. There are also other areas of general on street parking which are available to residents.

The excel file details the dates and times of the photographs (the photographs also have dates and times printed on them). You will find at least 4 set of times that photographs were taken for each day over the 7 day period.

At no point in time were there less than 4 spaces available for parking across the two described areas. The average number of parking spaces available over the time period was 8. I hope this provides the support required that parking is not an issue on Grange Close and there is plenty of parking available.

Please note that this letter and the Excel file will be provided as an attachment to an email in electronic format and will also accompany the hard copy photos to be delivered directly to the Council Offices in Havant. Electronic copies of the photos cannot be sent due to size constraints and previous issues you encountered with opening them.

Sincerely,

A large black rectangular redaction box covering the signature area.
