

Re:

Planning Applications

23rd June, 2022.

Dear Sir or Madam,

It has been brought to our attention by the owners 65, St. John's Avenue that a telephone mast has been applied to be erected on the green in St. John's Avenue.

We object to this installation for the following reasons:-

- 1) It would be an eye-sore to the estate which would effect house/ bungalows sales in the area as well as spoiling our green environment.
- 2) The beauty of living on this estate is that there has been no building on or to any of the green spaces since the estate evolved in early ^{years} of the 1960's.

P.T.O.

3). It is also known that such masts and their cabinets emit noise.

Surely, there is a more suitable location for such a mast?

Overall, I think there are too many posts, signs that dominate roads and verges in the area.

It would please us greatly if this mast can be erected elsewhere.

Thanking you.
