29th. February 2020

Dear Mr Toole,

We are writing about the large loft extension being undertaken at 25 Charlesworth Drive, WaterlooVille.

Apart from the damage to the street view, there is the potential for parking obstruction and road safety problems with difficult access to and from Charlesworth Gardens.

Already, the builder's vans are causing delays by reducing the road to one lane opposite the Gardens.

We understand the owner is the developer himself and therefore once completed will probably permanently park vans/ lorries in the Drive.

Parking problems have already led to the recent need for double yellow lines at various places along Charlesworth Drive, and especially at the junction of Hambledon Road and Charlesworth Drive. One particular truck causing that problem is now being dumped in Charlesworth Gardens.

It is painfully obvious that the next road to be obstructed by builder's vans would be the Gardens, leading to hazards and affecting road safety.

We therefore oppose this development.

Yours sincerely,
