Subject: Re: Comments for Planning Application APP/17/00351

Re Planning Application APP/17/00351 (2).

It is understood that some adjustments have been made to the above planning application and it has been resubmitted.

The principle and comments of my first objection still stand.

I would request that these be taken into account when the application is considered and that the application be rejected.

Regards

Harry Wilkinson

Comments Details

Commenter Type: Complainant
Stance: Customer objects to the Planning Application
Reasons for comment:
Comments: Whilst the supporting documentation (see Design and Access Statement page 4 shows just two 3 story buildings) the overwhelming number of properties in this area are 2 only stories. Any additional deviation will slowly erode the nature and appearance of this highly respected residential area.
Why the need to extend upwards when there is more than adequate ground floor area.

Should this application be supported then I would request that the glass balustrade on the west side be increased in height to remove any possibility of anybody looking north over the glass, thus having a direct view into and onto my home thus invading my privacy.

Any windows on the north aspect must be of such materials as to respect my privacy.
