Dear Pitney

Further to my previous communication I have given this matter further consideration which is

1/ As my property previously suffered subsidence also to the party wall due consideration be given to the depth of the footings so there is no reoccurrence

2/ Privacy and fire protection to high level windows on the boundary. Would prefer brickwork to full height or non opening windows with obscure glass

3/ The circular part of extension is on my boundary and will affect light to the rear of my property more than existing Therefore I suggest the that it is centralised or constructed on the left side of the main extension

Thank you for your time in this matter.

Yours sincerely
