Hello Mrs. R McMurray In reply to your letter of 11 April 2017. With ref. to the proposed site plan drawing A103V4.2.

We are not happy with the car park directly behind our garden fence. It will cause a lot of disturbance, noise & pollution. It will also impact on our privacy, outlook & security.

You have suggested acoustic fencing. Would we have the opportunity to choose the height & style.

Our other query concerns the two windows in the roof on the north elevation A105 V4. are they looking down into our garden or is the roof pitched, if not have they got opaque glass.

We can not see any other problems that might affect us at this point but who knows what might develop further on.

Regards Peter & Eileen Owens 30 Victoria Avenue.
